

Dear families,

Thank you for a lovely week. This week the children have been learning about the lifecycle of a frog. They have been able to make tadpoles using the playdough, make bubbles by blowing the soapy water and print frogspawn using bottle lids and paint. This week they have also had the opportunity to either read about the lifecycle of a frog or write about it. They have also made clocks by cutting and ordering the numbers and adding on the hand.

Please remember, as always, to practise their sounds and tricky words with them. We look forward to seeing who will win a certificate this week.

For home learning this week we would like the children to draw a picture of or write about the different things they did on either Saturday or Sunday. Can they put the different things in the order they did them?

Next week is our trip to Rosemoor Gardens (Friday 10th March). Please come in comfortable trousers and shoes e.g. jeans and trainers, but all children must wear their school jumper.

Please remember, that for those who normally have school dinners, a packed lunch will need to be provided.

Many thanks. Have a lovely weekend.

The Reception Team.
